Kladana
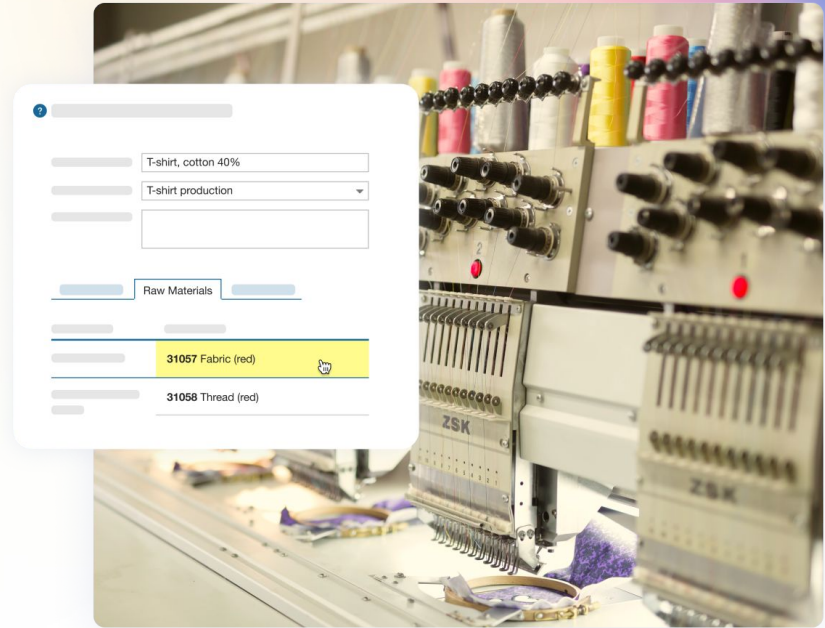

Take Control of Your Inventory, Sales and Manufacturing with Kladana

Kladana Is a Cloud-Based ERP for Inventory, Sales and Manufacturing Management

**It provides:**

- accurate inventory tracking,
- streamlines sales and purchasing processes,
- calculates costs and profits,
- helps to manage manufacturing,
- and generate comprehensive reports.

Our solution is designed for **small and medium-sized wholesale and manufacturing businesses and serves various industries**, from industrial to consumer goods such as cosmetics, food, apparel, and more.

Kladana

Simplifying Your Inventory, Sales, and Manufacturing Operations
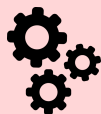

All-in-one Solution

You can run all business routines in one app: manage stock, production, and finances, print price tags, send invoices to the counterparties, etc.

Salim

Free onboarding from our expert

We will help you set up, ensuring a smooth onboarding. You'll have 1–3 onboarding sessions depending on your plan

From ₹4,920/$60 per year

Affordable Pricing

Pay monthly always. There are no 1 year commitments, and a 14-day trial is available with no credit card required

5 days a week

Constant Support

Our support team is available online to assist you with your queries from Monday to Friday. You'll get a response within 5–15 minutes, and custom documents — within 2–7 working days

Kladana

With Kladana, Our Clients Save Time & Earn More

Money

- Monitor your sales and find out more **profitable items**

- **Forecast** the **demand** and produce or purchase the most popular items

- Stop losing money on **over- and understocking**, scrap & by-products

- Stop paying for a bunch of solutions and **switching** from one app to another

Time

- Stop managing **spreadsheets** and **pieces of paper**. Automate your business and increase productivity a few times

- Don't **double-check** figures & papers, let digital tools do it for you

- Stop **missing deadlines** in producing items, delivering parcels, and other business routines

Customizable & Flexible Software

Kladana

Kladana is a universal solution that can be tailored to almost any entrepreneur's needs

Kladana is flexible enough to adjust to a particular **niche**. We have clients from different types of businesses and industries:

- Garment, tiles, electronics, food, pharma & instruments **manufacturers**

- Stationery, electronics, IT products & spiritual products **sellers & wholesalers**

Using customization tools, you'll be able to:

- Create custom documents and reports

- Add your own fields in the product cards & documents

- Set access rights and user roles

- Launch specific workflows

- And much more

Smooth Onboarding and Setup

We won't leave you to deal with Kladana on your own

Step 1

Welcome Call before Demo

Our expert will get in touch with you to understand what goals you pursue and what problems you come over with.

Step 2

Demos

The expert will conduct demos for you and your employees. They'll show you Kladana interface and features relevant to your business needs.

Also, you'll have an option to receive recorded sessions for reference.

Step 3

Onboarding   1–3 Sessions

After you purchase Kladana plan, the expert will onboard you and your team.

You'll get a personalized roadmap to harnessing the full potential of Kladana, customized to suit your business requirements.

Kladana

Smooth Onboarding and Setup

What's more

Online sessions

All demos are online. Upon request, we send you a video recording of the calls

Access to your Account

All the setups and adjustments will stay in your account

Non-Stop Support

The support you'll get as a client is not limited, you can contact the support team, and they'll get back to you within a few working hours

Handy Materials

In case you want to solve an issue on your own, you can use our Help Center and video tutorials on YouTube

Kladana

Why Kladana Is Better than Excel

Kladana

Kladana ERP

Centralized database that ensures data accuracy and consistency across all modules

Allows to track and manage **workflows**

Provides workflow management features that enable the **automation** of business processes from end to end

Almost **error-proof** and eliminates the human factor

Access to full **reports and dashboards** with which you can analyze your business thoroughly, find your competitive advantages and weak spots

Scalable solution which lets you use more modules and features when your company grows

Transparent and can be used by several users

Excel

Lacks the robust structure needed for comprehensive data handling in complex business environments

Collects and calculates data only

Lacks automation capabilities required for managing complex and interconnected business processes

Filling in the spreadsheets can lead to multiple error. Moreover, it's time-consuming

Offers you superficial analysis only

Excel instruments are limited and the most advanced tools are hard to master

Lacks collaborative features

Why Kladana Is Better than Excel

Kladana

Our Clients' Experience Proves that

Harshit Agarwal, the Financial Consultant at Unicorn Natural Products Manufacturing

Aliya Akhmetova and Inna Filipovich, the Founders of Hey Baby! Brand, Women's Business Apparel Manufacturing Company

Before Kladana, we were doing everything in Excel. All the stock and production records were maintained in spreadsheets. We weren't able to arrange timely updates for the information about warehouse stocks: the materials we were receiving, the goods we were shipping.

It was hard for us to acknowledge which products we had in abundance and which we lacked. Some wrong decisions and production delays followed.

We were tallying up sales in an Excel spreadsheet. Aliya's husband saw this picture, got horrified, and paid for our first account in Kladana. But the brain is lazy, it resists, it doesn't want to learn something new, to strain itself.

But Kladana turned out to be really convenient. A customer comes in, and you look them up solidly in the database, see their purchase history, and ask them how they liked the dress they bought last month. The customer base pushed us to create a loyalty program. As we came up with it five years ago, we still have it working with the help of Kladana.

Choose Your Plan

Trusted by 50,000+ Customers across the World: India, Kazakhstan, Uzbekistan, Russia, Turkey, Indonesia & Thailand

I was looking for a cloud-based solution to manage inventory and production. I started testing Kladana more for fun, but digitization quickly showed us its benefits.

We realized that it was advantageous for us to produce expensive products rather than mass-produced ones. Our stores, as well as our advertising campaign, changed. Retail outlets turned into showrooms. All of this allowed us to become leaders in the premium segment. Also, Kladana stopped the theft in our company.

Tanat Sarsembay,
Metako, steel doors manufacturing

"Kladana has been a great software for us. We were able to scale our warehousing and automate almost all of it because of Kladana. Moreover, it is **reasonably priced for any startup.**"

Samyak Jain, Co-founder of Ratan Papers, paper products manufacturing

---

"Kladana has been a great software for us. We were able to track our products and maintain records in place. It has made our **business process very smooth, flexible, and productive.**"

Rajeev Jha, Operation manager at Nextraa, internet provider

"While searching for a tool for our inventory management, we found Kladana as the best fit for our use case. It is **simple yet feature-rich** and has solved the problems we faced earlier. It is an effective way to track and monitor our products and has made daily operations simpler."

Raghav Rohila, Co-founder and CPO at Wattapp Technologies, hardware technologies devices and programming

---

We manage manufacturing in Kladana: create bills of materials and production operations, process sales & production orders, and even keep records of needles available in stock. We've got all info in Kladana — from a single piece of thread to each customer.

Kladana also helps us launch new collections. We evaluate how efficient the previous one was — estimate the sell-through of each item, and analyze what could slow down the sales and why.

Once Kladana helped us catch an unscrupulous manager who attributed someone else's sales to himself.

Inna and Aliya,
Hey Baby! women's business apparel manufacture

"With Kladana, we **improved data accuracy**, streamlined **workflows**, and boosted **decision-making capabilities**. The software played a crucial role in optimizing our data management practices, leading to increased operational efficiency and better business outcomes."

Cura Pharmaceuticals

I used to sell 80 beauty care goods on marketplaces. I tried to utilize Excel sheets, but inevitably made crucial mistakes. Then I realized that I could process no more than 20 products manually.

After six months of using Kladana, I started selling 300 goods, and the turnover increased from 2 million roubles (20 lakh rupees) up to 5 million roubles (50 lakh rupees). I also analyze what goods are the most and the least profitable ones.

Oleg Twisto,
a retail seller

Email Us: contact@kladana.com
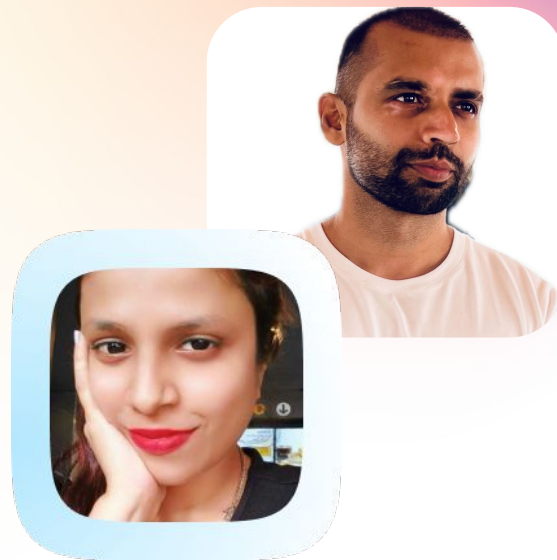

For Inventory Management

- Keep **accurate calculations** of stock and unit costs, based on the records

- Monitor stock levels using detailed reports

- Fill **all necessary item details** and use them to streamline sales, purchase, warehouse and manufacturing processes

Kladana

Manage Your Products and Services Catalog

Add necessary details
UOM, tax rate, HSN/SAC weight and volume images

Specify different Prices
and use them in transactions.
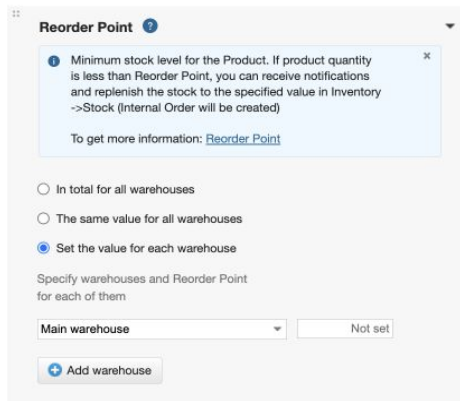

Create product Variants
and set different prices and Reorder Points for them

Kladana

Set Reorder Points for Items, Variants and Warehouses

If the stock falls below the Reorder Point, **receive notifications** to replenish products via supplier orders or warehouse transfers.

Generate or assign barcodes, and print labels.
— Use barcodes in warehouse operations.
— Print labels for all items in stock or for specific Receiving.

Kladana

Use Stock Reports

Stock report shows the state of the inventory for specific date

Stock Movement report shows movement for the selected period

You can filter report: see numbers for specific warehouse, item, product category, items in transit or committed, etc.

💧 Kladana

Organize Warehouse Space Using Warehouse Bin Locations

- Divide your warehouse space into Locations and Bins

- Assign bins to items in Receiving or Stock Adjustments

- Print Pick lists for Shipments with bin address for items

Kladana

What Else to Enhance Inventory Management and Warehousing

Try Inventory Management Features

- organize items into **categories,** create **Bundles** and **Packages** for products

- use **Batches** to track and manage inventory from different receivings or not to miss **expiry dates**

- set different price types, currencies, UOMs, country of origin

- **change prices in bulk** for remaining stock or Receiving using **price editor**

- quickly upload product cards in bulk using **.xls import**

- see **history of Sales/ Purchase transactions** for specific item

- create multiple **Warehouses**

- take **Inventory Counts**, find discrepancies and handle them

- use **barcode scanning** to check goods in Receiving, Shipment, Transfer or Inventory Count

- use **Negative Stock restriction** and **hard reservation** for goods to prohibit the shipment of reserved goods

Kladana

For Sales and Purchasing

Create all necessary types of transactions for **Sales** and **Purchasing flow**

Organize them as **'related' records** so you can track sequence like 'Order > Payment > Invoice > Shipment'

Record **Incoming** and **Outgoing Payments** against Sales or Purchasing records

Kladana

Calculate **taxes** in transactions and create documents with it

Subtotal	**10,000.00**
Type of Tax: GST ✎	
CGST	900.00
UTGST	900.00
☐ Tax Included	
Total	**11,800.00**

Quickly **share documents** with your partners via **email** or **print** them

Create Production Orders

Modify Finished products and Raw materials before production process begins (for customized products)

Analyze if Raw materials are sufficient before starting manufacturing

Supply missing Raw materials: purchase or produce them

🔷 **Kladana**

Make Changes in Production Order during the Process

Specify quantity of actually used raw materials or finished goods for any stage of manufacturing

Print Labels with Barcodes for Finished Goods

Even if you produce by batches for the one PO — you can print labels for already finished goods

Kladana

Production Order # 00023 from 01/25/2023 14:13

Code	BOM	Finished Products	Volume Ratio	Operation	Ready	Completed
00023-1	BOM leather bag (01)	Leather bag - 10 pcs	10	cutting	10	01/25/2023 14:35
				sewing	10	01/25/2023 14:35
				decorating	10	01/25/2023 14:36
				packing	10	01/25/2023 14:36
00023-2	BOM leather bag (01)	Leather bag - 10 pcs	10	cutting	0	
				sewing	0	

Produce in Batches

You can define size of batches before or along with production process, e.g. release as a ready batch what was produced during the day or week

Produce in one Operation or Stage-by-Stage

Monitor production process: how much is already produced, which stage is already completed and by whom.

Kladana

What Else to Manage Manufacturing

- Print **BOM** with **estimated cost** of finished product

- Get **unit cost** calculations automatically based on raw materials cost, labour cost, and operational cost

- Define **several products** as 'finished goods' in BOM (and count Scrap using this)

- **Reserve** Raw materials for specific Production order (if required)

- **Allocate** products in unfinished PO to **'awaiting stock'**.
  After that goods in production can be reserved in Sales Orders or monitored in Stock reports

- Assign each production stage to **specific person**

- Monitor **Changes History** in an operation report

- Use **Statuses**, **Custom Fields**, **Custom Print forms** to customize your production process

Try Production Management Features

Free 14-Day Trial without any Limits

Kladana

What Else to Manage Manufacturing

- Use different **Warehouses** for accurate accounting of raw materials, semi finished and finished goods

- Schedule production orders in advance

- Maintain Subcontractor manufacturing (via creating included Production Orders and links between transactions)

- Use **partial manufacturing**, run production in different locations, and manage external job work

- **Monitor:**

  ○ volume of Produced goods and used Raw materials in Stock Movement report

  ○ volume of Work in Progress in the list of Production Orders

  ○ WIP as 'in transit' in Stock reports

Try Production Management Features

Free 14-Day Trial without any Limits

Kladana

Non-Stop Feature Updates

Once or twice a month we release new Kladana features for inventory management, manufacturing, sales, integrations, etc.
See for yourself our recent updates

Recent Feature Releases

February 21, 2024

New Integrations:

- CRM — Zoho CRM, Hubspot, Pipedrive & Salesforce

- Accounting — Zoho Books

- Ecommerce — Shopify & WooCommerce

- WhatsApp

Connect Kladana with popular software

Production update:

- Now you can edit positions at the final stage of the production process. This allows you to consider unplanned waste during the production process or after the process is completed to break them down into modifications or goods items obtained during production.

Supply update:

- You can now create Stock Replenishment from Internal Order and add there Purchase Order, Production Order, or Stock Transfer. It helps to plan production while you are checking and planning inventory. If you have set up a minimum stock amount for inventory, you can automatically create an internal order from the Stock report just by clicking the button — Replenish stock. And then pass it to the production.

Try New Feature

February 5, 2024

Production updates:
